

IF YOU NEED TO CUT OUT FAST: LASER MICRODISSECTION SYSTEMS BY OLYMPUS.

Avoid time-consuming preparation and start work straight away. With our ready-to-use CellCut and SmartCut Laser Microdissection Systems, you can easily cut out cells and quickly examine their components, such as DNA, RNA and proteins. The patented procedure ensures that all tissue and cell samples remain absolutely contamination-free.

Save time and benefit from the totally precise incisions made by the durable laser, whose fine focussing prevents unwanted heating of the tissue. With their user-friendly software, CellCut and SmartCut are ideal for reliable and cost-effective microdissection. Quick, easy and clean. Don't waste another minute!
